# WASHINGTON CLEAN ENERGY ROUNDTABLE

**April 4-5, 2012**

*House of Sweden Conference Center  
2900 K Street, N.W., Washington, D.C.*

Dear Colleague,

Montreux Energy is pleased to invite you to join our **Washington Clean Energy Roundtable**, to be held **April 4-5, 2012** at the House of Sweden in Washington, DC. Our 5th Washington Roundtable will convene 100 key industry partners and investors, along with leading government policy-makers and regulators. Our theme will be, "*Clean Energy, Mobility, and Natural Gas: Energy Security and Economic Development in a Time of Transition.*"

Westport Innovations, BP Alternative Energy, and Duke Energy are our Global Sponsors.

With oil prices rising on supply constraints and tensions in the Gulf, and with more uncertainty (and higher gasoline prices) ahead in this election year, what should our strategies and policies be for investment in safe, secure, affordable clean energy? What are **your** visions for national and global clean energy policies?

*Program & Registration:* <http://www.montreuxenergy.com/roundtables/washington2012/>  
*Registration:* \$950 Industry | \$500 NGO/Research/Academia

Please join us to share your visions. We look forward to having you with us!

Sincerely,

Andrew Bermingham, CEO

We will also soon be announcing the program for our 13th **Aspen Clean Energy Roundtable™**, **June 4-6, 2012**: "*Natural Gas, Renewables, and Clean Mobility: Leadership in Global Clean Energy Investment Portfolios.*" Limited speaking and sponsorship opportunities are available.

## MONTREUX ENERGY

Montreux Energy organizes senior-level strategy roundtables on the future of global energy investment. Since 1990, over 7000 leaders have participated in Montreux Energy roundtables. The first Montreux Energy Roundtable was held in 1990 in Montreux, Switzerland as a dialogue between OPEC, the International Energy Agency, oil & gas majors, producing countries, energy service companies, and the international banking community. Montreux Energy continues to convene broad and comprehensive discussions of the landscape for energy supply, demand, and emissions over a practical, five- to ten-year investment horizon. We debate policy, technology, and investment trade-offs as we transition to a clean energy future. We endeavor to include all industry and thought leaders in energy, power, transportation, infrastructure, and services.

The objectives of Montreux Energy are to engage constructive, interactive, stakeholder dialogue. We host key regulators and policy officials, from local, state, federal, and international organizations, and we invite new, creative thinking on how to modify, guide, and incent consumer behavior, responsibility, and leadership.
